Kisan K2

An efficient counterfeit detection and fitness 2 pocket sorting machine

The K2 is a fast and productive two pocket value counter that allows staff to count money continuously. Single pocket counters must be stopped and the problem notes removed each time to continue, the K2 eliminates that problem making counting much quicker and easier for staff. Like all Kisan products, it uses state of the art technology for efficient counterfeit detection and fitness sorting

Special Features

- Multiple currency packs available
- Can recognise serial numbers of every note in a batch, allowing it to reject blacklisted serial numbers and record a log of all notes in a count. Small footprint takes up minimal desk space
- 2 pocket mixed value counter
- Hopper capacity: 500 notes Speed: 1200 notes per minute
- Auto currency detection
- Dimensions: 260x265x279mm
- Weight: 8Kg
- The reject pocket will take any notes which the device does not like for whatever reason
- Single pocket counters must be stopped and the problem notes removed each time to continue, the K2 eliminates that problem making counting much quicker and easier for staff
