MOBILE POS

The addition of a mobile or tablet PoS offers clients more success when reacting to changing conditions.

In peak hours, a mobile PoS allows staff to minimise waiting times at the point of queuing; improving the all-important customer experience and boosting customer retention.

Minimise waiting times at the point of queuing.

Switch between mobile and then docked status for flexible EPoS.

Used for mobile trolley service conditions, pop-up events and stalls.

Work wirelessly through WiFi or 3G and 4G networks.

Also work offline if there is no network facility or in the case of a network failure.

ALL-IN-ONE SOLUTION

Scanning and taking orders, processing payment, printing receipt, syncing data, all in one compact device

ALL FUNCTIONS OF A FULL SIZE TILL

- Accepting all kinds of payments – EFT, mobile and cashless token, Android Pay/Apple Pay, cash
- Promotions with meal deals, discounts, vouchers, etc. Loyalty schemes with points collection and redemption
- Ready-to-access allergen and ingredient information
- Fully integrated with Uniware Cloud back-office system for real-time reporting and business intelligence

Queue Busting Mode

Speed up your operation and maximise sales at peak time, reducing average customer waiting time by up to 65%

Table Service Mode

Better protect customers in a world with Covid, with all specialised features to ensure a smooth and efficient operation – automatic prompts for sale of sides and extras, splitting bills, prompting for tips, etc
